BROOKS HIRE

“Better Being With Brooks”

Rapid Deployment Relocatable Standpipe

A clever, robust standpipe construction, designed and extensively tested to ensure performance in the harshest and most remote environments.

Rapid & Safe Deployment

Rapid deployment means Liquimech standpipes are perfect for civil, mining and industrial projects where the worksite continues to move throughout the duration.

Size

Available in 6 standard sizes 4.2M - 8.5M allowing for a 6 x 4 watercart up to a 789 tanker.

Options

Hot dip galvanised, duplex coated, stainless steel or HDPE constructions
Liquimech has a unit to suit any requirement, all manufactured to handle the harshest of environments.

Construction

Liquimech standpipes sport a super strong and robust construction designed and developed as always, through our core mantra's of Increased Safety, Increased Productivity, Decreased Downtime and Savings on Operational Costs.

- ✔ Easily moved with integrated fork pocket, and rated lifting eyes.
- ✔ Assembled in less than fifteen minutes, thanks to Liquimech's proprietary Patent pending folding design.
- ✔ No need for personnel to be working under suspended loads or use of EWP's to install, minimising risk.
- ✔ Modularised to enable the standard unit to be easily adapted to work in high wind zones as per AS/NZS1170.

“Better Being With Brooks”

Liquimech Advantages

Liquimech Over Head truck fill has been designed for absolute safety and efficiency. As with All Liquimech Manufactured solutions all items need to meet our high level core mantras of Quicker, Safer, Better. Liquimech Patented Safestand provides Guaranteed satisfaction and savings reflected in your bottom line.

Safe

No Personell Working under Suspended Loads or working at Heights. All modules are also light weight, reducing manual handling risks.

Mobile

Liquimech Propreitry design allows the unit to be transported easily, our water filled ballast ensures the units are easily mobilised with small equipment. with both fork pockets and rated lifting eyes, Mobilisation & placement are a breeze.

Cost Savings

No EWP or Cranage Required onsite. One person install.

Proven

Liquimech Overhead truck fill units have not only been through both vigourous in-house engineering & testing, they have also been proven in real life conditions. From the tropics of PNG to the harsh unforgiving Pilbara these units have stood the ultimate test of time!
