HUSQVARNA COMPACTION EQUIPMENT

LG 504

Product Specifications

WEIGHT

513 kg

SPEED

32 m / min

VIBRATING FREQUENCY

69 Hz

ENGINE POWER

9.2 kW

MAXIMIZING UPTIME AND EFFICIENCY

Our mid-size forward and reversible plate compactor family provides impressive traction, particularly on wet soil, thanks to high frequency, high centrifugal force and high amplitude. These models have an ergonomic design and easy access for service and maintenance. The compaction indicator helps you get it right the first time.

This range of compactors can handle both deep and medium-deep compaction of granular soils, and like all our forward and reversible plate compactors, they are an effective

alternative and complement to rollers when compacting soil in confined areas.

High speed and machine balance contribute to easy handling, even on rough surfaces. The vibration damped handle also contributes to easy handling as well. This, combined with overall ergonomics, enable the user to work for longer periods more effectively, staying concentrated on the task at hand.

BROOKS
EQUIPMENT

FORWARD AND REVERSIBLE PLATE COMPACTORS > MEDIUM

ERGONOMICS ADD EFFICIENCY

The vibration damping handle allows you to work efficiently for hours.

KNOW WHEN YOU'RE DONE

The optional compaction indicator tells you when the ground is ideally compacted and when it's time to move on to the next task.

SERVICE MADE EASY

All service points are easily accessible.

MORE UPTIME

The heavy-duty protection frame with impact-resistant covers will protect both engine and transmission.

EASY OPERATION

The forward/reverse lever and fixed handle grip makes handling easy on all surfaces. You don't have to push/pull constantly during operation.

WEAR RESISTANT

The bottom plates on the LG-range are made from an extremely robust and wear resistant steel quality called Hardox 400.

HUSQVARNA LG 504

GETTING THE JOB DONE JUST RIGHT – THE FIRST TIME

The optional Compaction Indicator available for Husqvarna LG 400 and LG 504 helps save both time and money. A clear system of indicator lights shows when sufficient compaction has been achieved. This also reduces the risk of over-compaction, which can lead to unsatisfactory end results and unnecessary wear on the machine. Together, your skills and the Compaction Indicator will master any soils or rockfill berths.
