For challenging tasks, you need a first-class partner

Quality comes from experience. And from new ideas. This is why we combine these two crucial factors at SANY. This is because we are one of the world's leading producers, having sold more than **250 000** excavators in **10 years**. This means that you can always rely on sophisticated products that have been tried and tested in practice. An impressive **5-7%** of our annual turnover is dedicated to research and development. This is why we give you not only our word, but also our extraordinary **five-year warranty** as a guarantee of how powerful and robust our products are.

**THE SPECIALIST WHEN
IT COMES TO VERSATILITY**

With the SANY SY215C crawler excavator, you get more done. No matter where used – it applies its power with precision. This is because every detail is specifically designed for the tough conditions on construction sites. This excavator is a real all-rounder and a specialist in every discipline, from quick loading to precise digging and powerful demolition work.

What particularly sets it apart is its ability to control its tremendous power with great precision – for maximum productivity and therefore a fast return on investment.

BROOKS
EQUIPMENT

TOP PROPERTIES

ECONOMY

IT IS AS LOW IN CONSUMPTION AS IT IS POWERFUL IN PERFORMANCE

The highly efficient engine with common rail technology guarantees excellent performance. Four different operating modes for the various operating conditions precisely adjust the engine and hydraulic power to the requirements. This improves the excavator's response behaviour and ensures lower fuel consumption and reduced emissions.

SY215C

ECONOMY

Cost-effectiveness thanks to maximum flexibility

Whether digging, loading, demolishing, transporting, hammering, or performing other tasks, the SANY SY215C tackles a wide range of tasks without compromise – and without long changeover or waiting times. The pre-installed quick-coupler line means that many attachment devices can be fitted.

QUALITY

Durable and robust – the SY215C can be used wherever the going gets tough. This means that it must be able to withstand a great deal. No problem for the SY215C, as with its reinforced, **extremely robust undercarriage** and particularly clean, **robot-welded seams**, it is exactly the right excavator for hard day-to-day work on construction sites.

USER EXPERIENCE

Comfortable workstation – the cabin of the SY215C leaves nothing to be desired. All of the controls are within easy reach from the air-suspension seat which supports the driver's back. **Maintenance and service support** is also easy to reach: Thanks to the large and easily accessible service doors and clear layout of the most important components, this work is **quick and easy** to complete.

DIMENSIONS

Agile power – the SY215C works through its programme quickly and with great power. This excavator has great power reserves in its 22 tonnes. The machine is mounted on a stable HD undercarriage so that it can be used to the full.

SAFETY

Safety as a production factor – it is only possible to work cost-effectively if you work safely. This is why the **large safety package** has everything included as standard, from a travel alarm to the rotating beacon, and from the boom safety valve to the overload warning for lifting and the camera.

COMPONENTS

High quality and tried-&-tested – the water-cooled Cummins diesel engine with common rail technology and AdBlue system guarantees **reliable performance**, even under tough working conditions. The complete package is rounded off by the finely tuned Kawasaki hydraulic system.

ECONOMY

Power and efficiency – the smart hydraulic control system adapts the pump power to the available engine power. This means **greater efficiency** and **lower fuel consumption**, thereby providing excellent **cost-effectiveness**.

QUALITY

A very stable foundation

The machines have a great deal of work to do during their tough day-to-day work on construction sites. This is why – from the design stage, to selecting the materials used, quality and conducting the final checks – all excavators by SANY are designed to be robust. For instance, all welded seams are computer-controlled by robots – this maximum precision ensures stability and reliability.

In addition, the robust, wide heavy-duty undercarriage provides a high level of stability. This allows the SY215C to optimally apply its power. Also good to know: All of the access panels are only made from metal.

Absolute reliability – for peace of mind!

SANY's four-year warranty* gives you the assurance that you can fully count on your equipment.

* With participating partners

COMPONENTS

Improved performance thanks to optimised hydraulics

The position-controlled hydraulic system adjusts the required pressure and oil quantity according to requirements. The powerful, variable piston pumps reach a flow rate of 2 x 222 l/min and therefore achieve a very high level of efficiency at a low engine speed.

1300 BROOKS (276 657)

@ service@brooksequipment.com.au

www.brooksequipment.com.au

BROOKS
EQUIPMENT

DIMENSIONS

UP TO THE TASK ON EVERY SURFACE

The SY215C's particularly stable heavy-duty undercarriage provides the maximum possible stability. Its welded reinforcements and the use of robust, high-strength steel ensure minimal wear, even when used continually under the maximum load.

The steel chains used also offer the highest quality standard – for a stable foundation on any surface.

Our highlights – the added benefits SANY offers you:

- + A comfortable driver's cab
- + Fast, powerful hydraulics
- + A clear overview of instruments and display
- + Heavy-duty undercarriage
- + Extensive safety equipment
- + High-quality welded seams
- + ROPS/FOPS-certified

SAFETY

Best visibility even in poor lighting conditions

Good visibility is required for precise, quick work. In the worst-case scenario, the SY215C itself will provide sufficient lighting. The operating area is illuminated by two LED roof headlamps, two LED headlamps on the boom, one in the superstructure and an LED headlight facing backwards. The high-quality LED lights not only stand out thanks to their particularly good illumination, but also due to their low power consumption and extreme durability, while also being virtually maintenance-free.

USER EXPERIENCE

THE NEW COMFORT ZONE

For drivers to fully concentrate on their work, they first need to be sitting comfortably. The individually adjustable, air-suspension seat offers a comfortable workstation from which all of the controls are within easy reach. It goes without saying that the multifunctional control levers are located at the centre. This makes it possible to reliably and precisely control the attachment devices, directly relaying the control commands without delay. For even greater comfort: The standard equipment supplied includes the large monitor which can be set to several languages, the automatic climate control system which provides pleasant temperatures even in the summer, the powerful heating, the radio with an additional USB port for the driver's own audio devices and the large storage compartments for everything which the driver needs close to hand.

USER EXPERIENCE

Minimising maintenance times and maximising operating times

All serviceable components are easily accessible. This means that any maintenance and service support can be carried out efficiently and safely, reducing unproductive downtime and increasing machine availability.

In particular, routine daily checks are quick, simple and safe to perform manually as handrails, an anti-slip tread surfaces and an electrical supply for a lamp ensure maximum safety during maintenance work.

A SERVICE YOU CAN RELY ON

Just as we do with our excavators, we also demand high quality and reliability of our service products. This underlines our equipment's performance in terms of their durability and their excellent price-performance ratio. After all, maintenance is crucial

for efficiency, cost-effectiveness and safety. Your SANY dealer is happy to help you with a comprehensive range of services to ensure that your machine continues operating efficiently in the long term.

SANY – flexible, fast and always there for you

Rapid assistance, tailored advice and a reliable supply of original parts – that is what we mean by a premium service.

The added benefits SANY offers you:

- + Fast supply due to central located parts warehouses
- + More than 15,000 spare parts to make your machine highly reliable
- + Expert knowledge for optimal supply for your machine
- + Thanks to SANY's special training programme, our dealers are always kept up-to-date so that they can face all technical challenges.

Parts supply – quick and reliable

With the purchase of a SANY crawler excavator you have made an investment in the future. Fast availability of spare parts is your guarantee of minimal down times and failure times.

Detailed information in black and white

Handbooks and documents are available for all SANY compact excavators, and these can help you with operation, maintenance, servicing and repairs. These include operating and maintenance instructions and technical specifications.

THE ALLROUNDER THAT PICKS UP EVERYTHING

The SANY SY215C is a powerful all-rounder which combines flexibility and power. It can therefore perform various tasks in a wide range of applications and its robust design means that it is comfortable even with difficult tasks and tough environments.

DURABLE AND ROBUST

The SY215C can be used whenever the going really gets tough. This means that it must be able to withstand a great deal. No problem, as with its reinforced, **extremely robust undercarriage** and **particularly clean, robot-welded seams**, the SY215C is exactly the right excavator for hard day-to-day work on construction sites.

COMFORTABLE WORKSTATION

You know there are good **ergonomics** when you can still concentrate on your work after several hours. No problem in the cockpit of the SY215C because the seat and controls have been **designed for practical requirements**. For example, the additional hydraulic circuits can be operated using the joysticks.

AGILE POWER

The stable **heavy-duty undercarriage** and its sheer mass provide the SY215C with the stability required to make **quick and powerful operational movements**. The excavator can therefore even tackle large tasks in a short time.

SAFETY AS A PRODUCTION FACTOR

The clever cab structure provides a clear view of the working area and the **camera supplied as standard** provides a good overview, including of the area behind the excavator. The **overload warning** and the **safety valve** are absolutely essential when the boom is used for lifting. Moreover, when performing maintenance and servicing tasks, handrails and anti-slip tread surfaces provide you with the required stability.

HIGH QUALITY AND TRIED-AND-TESTED

With its maximum torque of 732 Nm at 1500 rpm, the very strong **six-cylinder Cummins engine** brings an incredible amount of power.

EFFICIENCY AND POWER

In conjunction with the electronic fuel injection, the **autothrottle function** adjusts the engine speed to the power required. This means that the **smart hydraulic system** reduces the fuel consumption, engine wear and exhaust emissions. In addition, the excavator's **low maintenance requirements and long intervals between maintenance** save operating costs and increase the cost-effectiveness.

TECHNICAL HIGHLIGHTS

Engine	CUMMINS QSB6.7
