ABOUT US

THE STORY OF BROOKS

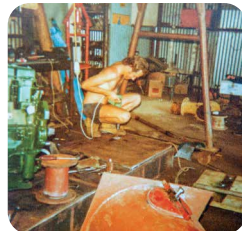

5

1979... at the age of just 23, Doug Brooks took a risk and purchased two unserviceable air compressors on bank card.

Between working 12 hour shifts as a Fitter on Barrow Island, Doug repaired the compressors and soon started hiring them out.

Not long after that, Doug quit his job and opened 'BROOKS HIRE'. He ran his business from a tin shed in the remote WA town of Eneabba while living in a humpy at the back of the shed.

Brooks Hire Service is 100% Australian owned and operated. We've built our reputation of reliability and integrity from our humble beginnings in 1979.

1987... After meeting Roma the love of his life, Doug moves the business to Perth where they open a branch in Cannington.

1982... Doug purchased his first piece of mobile equipment, a JEC crane. He drove the crane for 13 hours from Perth to Eneabba to get it on site.

1993... Doug and Roma purchase a vacant block of land in Canning Vale. Doug custom builds the infrastructure to accommodate his growing business.

2000... Eldest son Keith Brooks (left), and cousin Steve Drage join Brooks Hire as Apprentice Plant Mechanics. They are now Operations Manager and Branch Manager respectively.

1997
100 Machines
On Hire!

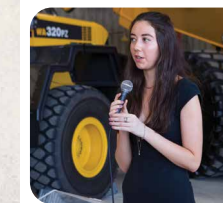

Based on our reliability and trusted reputation, Brooks Hire has now grown to include 19 branches Australia wide, with over 5000 pieces of equipment for hire. That's why you're better being with Brooks.

2002... Second son Stuart Brooks joins Brooks Hire as an Apprentice Plant Mechanic before moving into the Hire Department. He is now the Managing Director of the Brooks Group of companies.

2009... The GFC hits Brooks hard but Doug takes a risk and opens a second branch in Karratha, WA. It pays off and is a real turning point for the business.

2012... After completing a Degree in Commerce, the youngest Brooks, Lenore joins the Brooks Hire team. Lenore is now the General Manager of the Hire Division.

2003... Brooks Hire introduce their 'Harley Davidson Motorbike Giveaway' competition with the first winner being Complete Underground Power.

2020... The Brooks family celebrates 40 years in business.

2014

Brooks Site Services

Brooks Site Services is a part of the Brooks Hire Group. With over 40 years experience in construction machinery, we've built a solid reputation of reliability and integrity.

We specialise in all aspects of site services from power, and water management, to on site buildings, and light vehicle hire. The differentiating factor of our Site Services division is that not only does Brooks supply the equipment, we have the technical expertise to engineer a complete dewatering or power generation solution for your work site, install, and maintain it.

Our team is backed up with a purpose-built workshop and test facility, trade qualified technicians, and hire coordinators who are always on standby for around the clock service.

Every industry, we've got you covered!

Civil

There are many large civil construction projects that Brooks Hire have been involved in.

Road/Rail

We have every machine required for the construction of roads, railways, bridges, tunnels and more.

Mining

Our Australia wide mining clients benefit from our range of state of the art mining machinery.

Site Services

We have the capability to design the whole system, install, and maintain it.

Pipeline

You'll find all of the necessary machines and attachments for pipeline construction at Brooks Hire.

Energy

Providing equipment for constructing refining plants and the day to day operations of the facility.

Brooks Access

Lifting You To New Heights

Elevated Work Platforms Association

Telescopic Handler Association

Brooks Access was established to broaden the range of hire equipment that Brooks Hire Service has to offer. The access division offers our clients a wide range of lifting and access equipment that caters to the construction, agricultural, and oil and gas industries.

We only source equipment from quality suppliers. Our equipment is serviced and maintained to the highest safety standards and OEM guidelines.

We stock access equipment in the following categories...

Brooks Transport

The Evolution of Brooks Transport

1980's

The first piece of mobile machinery that was ever purchased by Brooks Hire Service was an 8 tonne JEC crane. The machine was located in Perth, and it needed to be transported to Eneabba, some 300kms away. Unable to afford the cost of transport, Doug Brooks decided to drive the crane there himself. After a near miss with a passing truck, it was clear to Doug that he needed to come up with a safe and affordable way to transport his machines.

A short time after this, Brooks Hire Service invested in their first prime mover, a White Road Commander. As the business grew, so did their fleet of trucks.

1990's

2000's

2010's

Fast forward to 2020 and it was clear that Brooks Hire Service now had the capacity to branch out and establish a national transport business in its own right. Four brand new Volvo FH540 6x4 prime movers were purchased along with several custom made low loader trailers. These vehicles joined the existing fleet of prime movers, tilt tray trucks, and tipper trucks to form Brooks Transport.

2022

Brooks Transport is no longer limited to only transporting our own machines. We have the capability to provide a fully rounded freight service for any type of cargo, to any location in Australia.

Heavy Haulage Australia Wide

In addition to our heavy prime mover and low loader transport service, Brooks Transport also offer tipper trucks, side tippers, freight trucks, tilt trays, trailers, and dolly trailers for hire.

Brooks Equipment

Brooks Equipment was formed following repeated customer enquiry to purchase construction machinery.

This branch of the Brooks Group specialises in the sale of new and used construction equipment.

We have also forged alliances with trusted manufacturers such as Husqvarna Construction, Italdem, Genmac, and Chicago Pneumatic to bring our customers a range of quality equipment.

In addition to the sale of new construction equipment, Brooks Equipment also offers our customers a range of used earthmoving plant.

New parts, used parts, and finance options are also available to our clients.

Brooks Airways

Brooks Airways has been Australia's leading private charter flight operator since 2001. We offer safe, reliable, and flexible private charter flights to individuals, and fly in fly out (FIFO) flights to the mining, oil and gas, and resources industries.

Our dedicated Perth-based FBO is conveniently located next to the Perth Airport regional car park and features a private lounge with full kitchen and bathroom facilities.

Brooks Airways has the flight capability to charter flights anywhere in Australia and internationally with remote airstrip capability.

Our charter flights can depart at any time that suits your requirements. That's why you're better being with Brooks.

Expert Air Charter Services

BROOKS
 AIRWAYS

In addition to our private charter flights, Brooks Airways also operates a dedicated medical evacuation (medEvac) division. Medical Air Ambulance has a skilled team of highly trained professional pilots & doctors on 24/7 standby, offering a complete bed to bed transfer service from anywhere in the world.

Our Medical Air fleet are fitted with modern medical equipment allowing ICU level care in the air.

- | Toowoomba & Surat Basin Enterprise
- | Australian Dial Before You Dig Assoc.
- | Family Business Association

Civil Contractors Federation

Brooks Hire has been a member of the Civil Contractor Federation since the early days. Being a member throughout our company's growth has shaped the way we do business with our civil clients. We know the industry well and continue to provide an excellent service to the civil construction industry throughout Australia. We also sponsor the Golf Day and Earth Awards annually.

QUALITY ASSURED

ISO 9001

BUREAU VERITAS
Certification

Our commitment to meet customer satisfaction and legal requirements in the industry.

ISO 9001 - Quality Management System (QMS)

Brooks Hire Service has voluntarily undertaken the requirements to achieve an ISO 9001 Certification. This certification requires that we meet at least five mandatory requirements for a QMS:

The Bureau Veritas Certification certificate is recognised as a symbol of excellence worldwide. It demonstrates our achievement and continued commitment to conduct our business in a thoroughly professional and consistent manner.

General Quality Management System

Production of a Quality Manual, Control Documents, and Control of Records.

Management Responsibility

Commitment to customer focus, defining responsibility, authority & communication.

Resource Management

Competence, awareness and training for human resources and work environment.

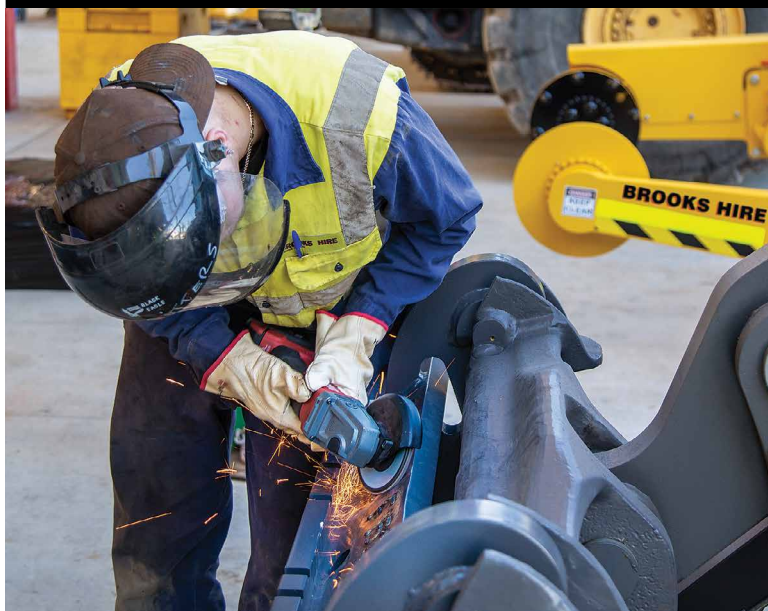

Product Realisation

The provision to plan, create and supply a service.

Measurement, Analysis & Improvement

Assessment of customer satisfaction, internal auditing & taking corrective actions.

Health and Safety

Safety is the number one priority in our workplace. Brooks Hire Service is committed to the ongoing improvement of safety in our workplace.

BROOKS

AS/NZS 4801

BUREAU VERITAS
Certification

AS/NZS 4801 - Occupational Health and Safety Management System

This certification demonstrates our knowledge and control over hazards and risks present in the workplace. Our compliance ensures that we implement practical policies and objectives to manage the health and safety of our employees. The benefits of this certification are:

- **Encourages A Culture Of Safety**
Staff are educated on safety policies and actively follow procedures.
- **Reduces Workplace Incidents**
A proper Safety Plan provides greater control over potential hazards.
- **Enhances Our Reputation**
As a safe and reliable partner, contractor & supplier.
- **Demonstrates Our Commitment**
To ongoing improvement of safety performance.

ENVIRONMENT

Taking a leadership approach to protect our most important assets.

BUREAU VERITAS
Certification

HYBRID EXCAVATOR INVESTMENT SET TO PAY OFF FOR WA'S BROOKS HIRE

Above Left: Colin Brindley, WA Construction & Utility Sales Manager, Grant Manhammett, WA Business Development Manager, Construction & Quarry, Doug Brooks, Premier Brooks Hire And Leasing, Brooks Business Graduate Brooks Hire And Also Doug's Daughter Received A Commemorative Plaque For Purchasing Two Komatsu Hybrid Excavators.

WITH THE RECENT PASSING OF THE FEDERAL GOVERNMENT'S CARBON TAX LEGISLATION TECHNOLOGY SUCH AS KOMATSU'S HYBRID EXCAVATORS IS LIKELY TO BECOME MORE SOUGHT AFTER, ACCORDING TO DOUG BROOKS, OWNER OF WESTERN AUSTRALIA BASED PLANT HIRE SPECIALIST BROOKS HIRE. The company – one of the largest Komatsu fleet owners in Australia with around 250 Komatsu units out of a total fleet size of 500 – has recently taken delivery of four HB215LC-1 Hybrid excavators, part of what Brooks sees as "the way of the future".

Given WA's mining boom, there is no shortage of work for any of Brooks Hire's equipment, but he believes the Hybrids will be a good investment for the future.

"Right now, things are pretty busy, but when things back off again, they'll be good to have in our fleet giving us a bit of an edge on our competitors," Doug said.

"I think in time to come that they will be sought after, especially as more contracts are drawn up with environmental issues in mind and the carbon tax is implemented."

"Now that the carbon tax legislation has been passed, as it filters down to the industry, I think there will be more and more organisations, especially government departments and bigger companies that want carbon tax credits – and technology like the Hybrids has to tick the boxes for it," he said.

"It's definitely a step in the right direction."

One of Brooks Hire's Hybrids is on hire to a customer in the Pilbara region of WA, with another working for Alcoa to the south of Perth, and according to Brooks are delivering significant fuel savings to his clients.

"They are achieving about 3 litres an hour, as opposed to a conventional machine which is up to 14 litres an hour. As they pay for

the fuel, that's saving them well over a drum a week, which they are pretty happy about," he said.

"But it's not just the cost per litre of the fuel. If you can save a tanker fuel run a week, that's another transport and delivery saving you are potentially making."

"Saving a drum of fuel a week, that's \$500 at current prices by the time it's in the machine. Multiply that by 52 weeks a year, then the

eight to nine years you have the machine for, and it's paid for itself."

"Those figures are very encouraging."

Based on his experiences, Doug is looking forward to seeing the Hybrid technology come to other types of earthmoving equipment.

"Komatsu needs a pat on the back for developing the Hybrid excavator technology, and I would like to see it implemented in trucks and other equipment," he said. ■

DOWN TO EARTH ISSUE 96 | 19

Brooks Hire Service are industry leaders when it comes to taking a proactive approach to environmental sustainability. Our company was one of the first plant hire companies in Australia to invest in Hybrid machinery which reduce fuel consumption and CO2 emissions. The majority of all of our new equipment purchased are fitted with the latest Tier 4 engines which adhere to the strictest EPA emissions requirements. In addition we've been actively reducing our own power consumption by installing solar panels and LED lighting at our branches.

ISO 14001 - Environmental Management System

ISO 14001 is the international standard that specifies requirements for an effective Environmental Management System (EMS). Brooks Hire Service voluntarily acquired this certification and adhere to strict compliance obligations focusing on reducing waste and improving resource efficiency.

COMMUNITY

The Brooks Hire philosophy involves contributing to the foundations of the community around us. As an Australian family owned and operated business, we are committed to 'giving back' to our fellow Australians.

We support many charity groups, voluntary organisations, community groups and sporting clubs at a grass roots level, fostering community spirit and engagement. From providing donations to lending our machinery, our involvement with the community stretches far and wide.

Adelaide Hills Bushfire Cleanup

Mandurah Wildlife Rescue

The Big Blue Digger Project

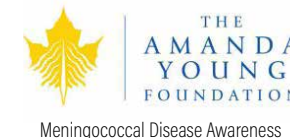

Proudly supporting

Brooks Hire Service is proud to announce the 'Big Blue Digger' project in conjunction with Ronald McDonald House Charities WA. Ronald McDonald House Charities offers support and essential care to the families of sick children, particularly those who live in remote locations.

We purchased this brand new Komatsu PC200 Excavator and have pledged to donate part of the hire rate to RMHC WA for every hour that it's on hire.

Just some of the groups we support

The Great Harley Davidson Draw

In 2003, Doug Brooks came up with the initiative to reward his valued clients every year with the chance to win a brand new Harley Davidson motorcycle. Every invoice over \$300 would go in the draw with the chance to win.

The great Harley Davidson Draw became synonymous with the annual Brooks Hire Christmas party, as did Doug's famous burnouts.

To date, Brooks Hire has given away 18 Harley Davidson motorcycles and the tradition looks set to continue.
