BROOKS HIRE

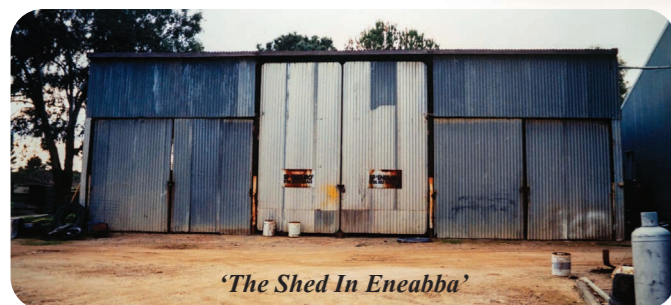

The story of Eneabba

1979

When 23 year old Doug Brooks recognised an opportunity to hire out equipment to the mining industry in WA in 1979, he knew it was something he had to pursue. With no business experience but plenty of ambition, young Doug scrambled together every dollar he had to purchase two disassembled compressors, with the remainder of the bill being settled by bankcard.

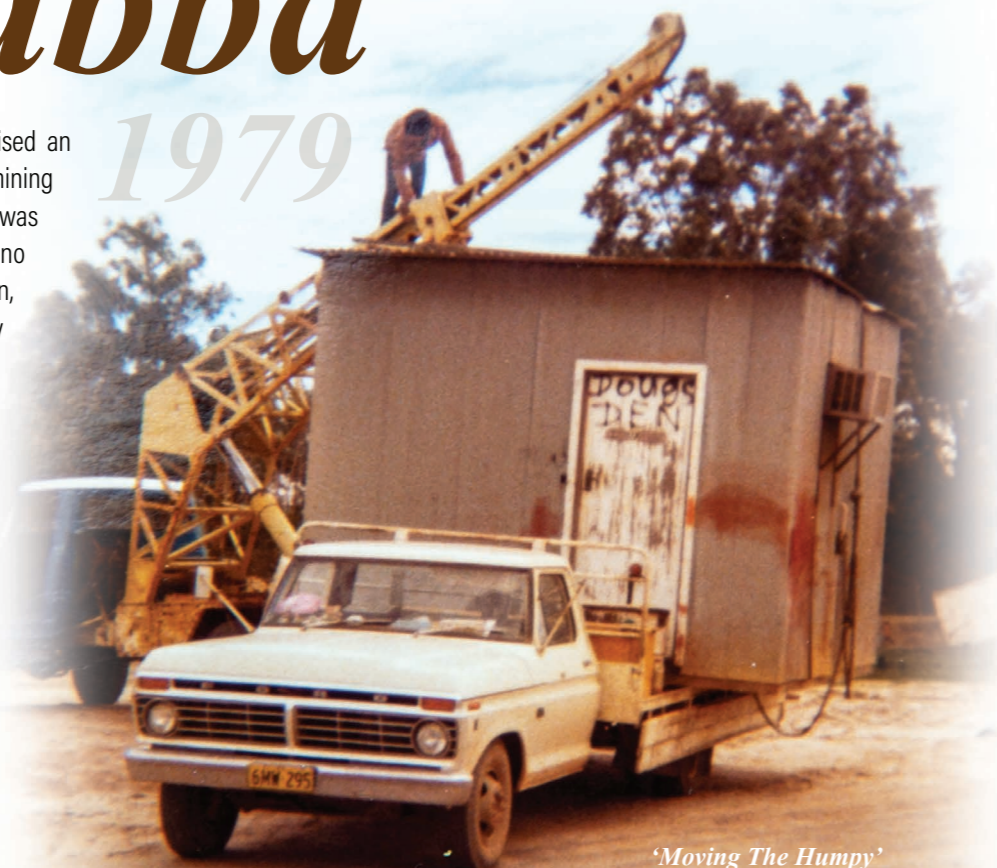

At the time, Doug was working 12 hour days as a Fitter on Barrow Island, and he fixed the unserviceable compressors in his spare time. After a few months of paying off his debts, Doug then made the bold decision to leave his job as a Fitter and start his own hire business.

'The Shed In Eneabba'

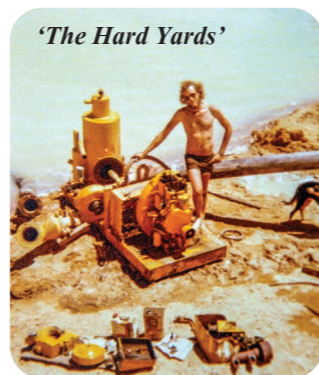

He opened 'Brooks Hire Service' and ran the business from a shed in the remote WA town of Eneabba. All the while Doug was living in a 'humpy' at the rear of the shed. There were many that warned him of the difficulty of starting a new business in a very competitive industry, but Doug was determined and it was only a matter of time before he was turning a profit on his compressors.

What started as two compressors on hire, soon turned into twelve pumps on hire, but the turning point came when Doug purchased his first piece of mobile equipment, an eight tonne JEC crane. The crane was purchased by tender in Perth and Doug didn't have the \$500 needed to freight the crane to Eneabba, so he drove it for 13 hours to get it there himself, with his trusty dog on board of course. This is a testament to the lengths that Doug would go, to ensure the success of Brooks Hire.

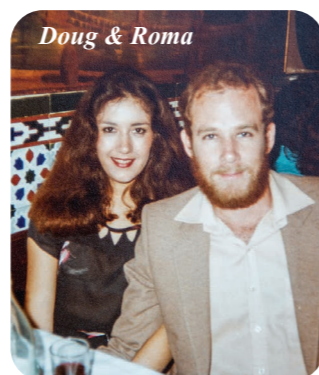

'Moving The Humpy'

There are many great stories that came out of that shed in Eneabba. It was the foundation of Brooks Hire and the place where all of the 'hard yards' were done. Doug would work long hours during the week, and then drive to Perth on the weekend for parts. It was during one of these trips that he met his future wife, Roma.

'The Hard Yards'

Doug & Roma

By 1983, with the business continuing to grow, and Doug pursuing his life with Roma, Brooks Hire set up shop in Hogarth Street, Cannington. Then in 1990, they purchased their own yard in Canning Vale, where the Head Office is still located today. But it is that shed in Eneabba that will be remembered as the birth place of Brooks Hire Service.

From the MD...

Where do I start? This quarter has been abuzz with new equipment, new office and workshop space, new employees, and new opportunities for the Brooks Group.

Brooks Access has started to gain momentum with equipment on hire as fast as it arrives through the door, led by General Manager Claire Harrison and Service Manager Evan Low the team have been working tirelessly to expand into the access equipment market. Although relatively new Brooks Access already has over 40 pieces of equipment on the books.

Just as busy and continually expanding Brooks Equipment received their first shipment of construction equipment from Italy and it was well worth the wait. Brooks were conscious that the quality of these products needed to meet Australian industry standards and I can confirm the generators and rock-breakers are even better than we anticipated with fantastic feedback from our clients. As the Eneabba goes to print 60 Genmac lighting towers will be arriving from Italy to our Welshpool showroom. This will be on top of the 40 Chicago Pneumatic lighting towers delivered to the Oxley branch recently. The eagerly awaited delivery of diesel water pumps is due in the coming weeks.

Brooks Transport have just purchased a Freightliner in Queensland and a Scania in Perth as we try to keep up with demand, we are still waiting on our 4 new Volvos currently still on the production line. These 4 should be due around November.

Brooks Hire is holding a steady 800+ machines on hire around the nation and is still on a massive expansion/renewal mission for our fleet of machines. We have purchased over 200 machines for the quarter which is a record!

More exciting news with Brooks Group now owning all 17 branches across Australia, we have purchased our last remaining leased premises furthering our stability and trust within the industry. The last 3 of our newest branches are making great headway, Mackay's Shawn Ryan and team recorded over 20 machines on hire with Port Augusta and Albany both hiring over 30 machines, well done to Robert Circocco and Ryan Brown and their teams.

Next weekend we are excited to welcome back our annual staff wine tour. Hopefully we make it out of the Swan Valley alive and for the first time our bond money back from the bus operator!

Brooks Access Up & Away

To keep up with an ever increasing fleet of equipment, the Brooks Group purchased two adjoining properties in Welshpool, Western Australia. The new properties are located on the corner of Murray Road North, and Orrong Road. It's an extremely high exposure site with a continuous stream of drive by traffic in Perth's construction machinery heartland. Both properties feature offices, warehouses, showrooms, sheds, and wash stand areas.

Brooks Equipment Sales occupy the corner site, while Brooks Access' Head Office is located next door at 45 Murray Road North, Welshpool WA 6106.

The first piece of equipment that Brooks Access took delivery of was a JLG R1932 19ft Scissor Lift. This piece of machinery already had its first hire job booked in before it arrived in our yard. Alistair Ramsay from Aury Australia was more than happy to see our General Manager, Claire Harrison personally deliver the scissor lift to their work site.

"Since commencing, Brooks Access has taken delivery of a range of equipment including knuckle booms, straight booms, electric scissor lifts and RT scissors," said Claire. "Opening up the Access division has allowed us to become a one stop shop for our clients. Our new yard is buzzing with activity. We have another 15 machines on order that will be arriving over the next few weeks."

"It's a super exciting time for Brooks Access and I'm excited to see where we go over the next year."

Claire Harrison, General Manager - Brooks Access

The Brooks Access website showing our full range of equipment is now live. Visit www.brooksaccess.com.au to get an easy online quote or call 1300 BROOKS (276 657).

The Brooks Group expands to meet the market

The Brooks Group of companies would like to introduce our newest division, Brooks Access.

Over the last year, Brooks Hire has been experiencing an increased demand for elevated work platforms and access equipment. With the desire to service all of our customer's needs, we decided to launch a new Brooks division specifically focusing on this category of equipment.

Brooks Access not only offers our clients a full range of access equipment for hire, we also give our clients the opportunity to purchase their own equipment. We have already taken delivery of a variety of Articulated Boom Lifts, Scissor Lifts, Telescopic Boom Lifts, and Telehandlers.

Existing Brooks Hire staff members, Claire Harrison and Evan Low have transferred to Brooks Access to take over management of the new division. Claire Harrison has taken on the role of General Manager, while Evan Low will be the Service Manager, responsible for keeping all of the equipment impeccably maintained to OEM and Australian work safe guidelines.

Alistair Ramsay from Aury Australia with Claire Harrison, General Manager of Brooks Access.

INDUSTRY SPOTLIGHT

THE Mining

Civil, Mining, and In-Situ Stabilisation

THE Mining Pty Ltd is a Civil & Mining Contracting company based predominantly in Darwin, Northern Territory, with operations throughout Australia.

The dedicated team at THE Mining pride themselves on delivering specific client needs with the highest level of service and quality. They have a proven track record for delivering projects on time and within budget to the client and consultant's specifications.

THE Mining have an established reputation for all aspects of civil construction including:

- Bridges
- Roads
- Pavements
- Bulk and Detailed Excavation
- Demolition
- Site Remediation
- Stormwater Services
- Subdivisions
- Structural Concrete and Formwork
- In-situ Stabilising

These services are available throughout the whole of Australia.

"We have a pavement stabilisation division which provides rehabilitation and maintenance solutions that are cost effective and extends the life of pavements."

Richard Sippel, General Manager - THE Mining

The pavement stabilisation division currently operates in all states with four Wirtgen WR 240 Stabilizers, eight Caterpillar RM 500 Stabilizers, six Stoltz Spreader Trucks, and one Streumaster Spreader. THE Mining are members of Austrab, the Pavement Recycling and Stabilisation Association of Australia.

To further improve the quality and consistency of their service, THE Mining are also CAL accredited. They have implemented a certified quality, health, safety, and environment (QHSE) management system which ensures best practice and full compliance with all legislative and regulatory requirements. "We were awarded certification to ISO9001 (Quality), ISO 14001 (Environmental), and AS4801 (Safety) in 2011," said General Manager, Richard Sippel.

Through their extensive operations, THE Mining currently employs over 35 personnel throughout Australia. "Our staff have an excellent understanding of the Mining, Civil Engineering and Construction industry," said Richard, "We can offer unsurpassed expertise and experience." THE Mining also has a strong focus on indigenous development, with over 15% of their workforce being indigenous.

Newel Highway Project - New South Wales.

Recently, THE Mining has been subcontracted to undertake the In-situ Stabilisation of the Newel Highway Project in New South Wales.

The \$94 million project will see upgrades to an 18 kilometre stretch of the Newel Highway, between Mungle Back Creek and Boggabilla in northern New South Wales. Upgrades include re-surfacing, widening the highway's lanes to 3.5 metres wide in each direction and providing wider road shoulders, intersection improvements, and two new overtaking lanes. Improved safety and freight transport productivity are just two of the benefits that motorists can expect to see following the upgrades.

The project is expected to take three years to complete as the whole highway will eventually be dug up and replaced with a new road surface that is wider and stronger with a one metre dividing lane, and two new overtaking lanes.

Essentially, THE Mining are responsible for the In-situ Stabilisation package of the Newel Highway Project. This involves treating the soil at the base level of the new highway to create a stable surface for the new road. Given their depth of experience in this field, and their fleet of specialised equipment, THE Mining will have no problems in completing a project of this scale to a standard that exceeds industry expectations.

Their services are not limited to In-situ Stabilisation, THE Mining also offer their clients a range of Civil Contracting services, steel fabrication services, and plant hire.

With over thirty years of experience in Civil Contracting, THE Mining has also been responsible for various other Mining and Civil Engineering projects. Some of these include:

- Darwin International Airport - Bond Helicopters & Carpark
- Ausco Modular - Accommodation Facility
- City of Darwin - Chrisp Street Sports Courts Upgrade
- JNC Group - Coonawarra Naval Base Sewerage Upgrade
- Haliko Developments - Stuart Highway Intersection

When undertaking a new project, General Manager, Richard Sippel works in close contact with his staff, customers, and suppliers to ensure a successful outcome for all parties.

"We believe that it's not about being the biggest, but more importantly doing the job right"

Richard Sippel, General Manager - THE Mining

THE Mining Pty Ltd can be contacted by calling (08) 8941 6980 or you can visit the website www.themining.com.au

Medical Air Ambulance

When emergencies happen in remote locations

Part Owners Doug Brooks and Shane Gifford, Aviation Manager Michael O'Grady, Medical Operations Manager Bruce Wicksteed, and Chief Pilot Martin Potier.

Mining and Construction sites can be some of the most hazardous work environments in Australia. Often these job sites are in remote locations, adding to the level of danger involved when an emergency arises. Despite vast improvements in job site safety, and the best efforts by companies to adhere to stringent safety measures, occasionally there are medical emergencies that require urgent evacuation. These may be the result of an accident, or they may simply be the result of an employee suffering a sudden illness. Either way it is imperative that an emergency evacuation plan is in place.

We caught up with Founder and Manager of Medical Air Ambulance, Shane Gifford, along with their Aviation Manager, Michael O'Grady, to find out about the options available when a MedEvac is required.

Who are Medical Air Ambulance? Tell us a little bit about your business.

Medical Air Ambulance are a WA based company operating from Perth Airport. Based in Western Australia, we have the capability to perform medical evacuations all over Australia, and internationally. Our services can be booked by private citizens, companies, and government bodies.

Operating six ICU configured Learjet aircraft, we can provide a comprehensive bed to bed medical repatriation service (MEDEVAC) that includes the management of hospital admission and transportation using a company ambulance and medical support staff.

“Since commencing in 2013, we have successfully completed hundreds of ICU level MedEvac missions...”

Michael O'Grady, Aviation Manager - Medical Air Ambulance

Most of Australia's mining takes place in remote locations. Can you tell us how Medical Air Ambulance can assist the Mining Sector in those regions?

Medical Air Ambulance has the capability to offer a dedicated 24/7 standby service for companies. We currently have standby contracts in place for Oil and Gas Companies who are conducting short term drilling and exploration projects. This service can also work for a consortium of mining companies who want a guaranteed on-call medical service at a lower cost.

Being a fully inclusive MedEvac provider, we do not rely on third party providers to assist our operations. This means that we are able to respond to accidents and incidents in remote areas in quick time. Our pilots and critical care registered nurses are on standby 24/7, so when we receive an emergency call, we have the ability to fly out from and return to our dedicated fixed base of operation (FBO) ensuring a seamless service from bed to bed.

Our fleet of jets have a long range of 3,700km and can reach speeds of 750km/hr, meaning we can reach remote locations throughout WA and beyond in a single leg.

Tell us about the aircraft and equipment that Medical Air Ambulance use:

The company has a fleet of Learjet 35A aircraft, all of which are certified to fly medical and charter flights under a Civil Aviation Safety Authority (CASA) Air Operation Certificate (AOC), and comply to the strictest safety standard in accordance with the Civil Aviation Act and other laws.

Medical Operations Manager Bruce Wicksteed inside one of the Medical ICU configured aircraft

What makes Medical Air Ambulance's service unique?

Many of our competitors are essentially 'brokers' for aero-medical services or rely heavily on external providers to provide the support required in aero-medical jet operations. Medical Air Ambulance is the only privately owned and operated, fully dedicated, non-government funded fixed wing jet Air Ambulance service based in Western Australia.

Our Medical Air fleet are fitted with state-of-the-art medical equipment allowing ICU level care in the air. All of our Flight Doctors and Flight Nurses are selected for their expertise in Emergency and/or Intensive Care in addition to their experience and knowledge of aero-medicine.

When it comes to medical services, particularly when they also involve air travel, safety and experience are the most important factors to consider. It's reassuring to know that a company like Medical Air Ambulance is also used by the WA Health Department for interstate transfers, and The Newborn Emergency Transport Service of WA (NETS WA) to transfer critically ill babies.

Medical Air Ambulance can be contacted by calling 1300 633 247.

For more information, you can visit their website

www.medicalair.com.au

MEDICAL AIR AMBULANCE LEARJET FLEET

Aircraft Type:	Gates Learjet 35A
Fleet Size:	6 Aircraft available
Aircrew:	2 Flight Crew
Medical Configuration:	Permanent MedEvac ICU configuration with Life Port stretcher, critical care medical equipment, and 3 pax seating (including medical staff).
Charter Configuration:	Up to 6 pax
Aircraft Range:	2,100 nm (3,700km) at 420kts (750km/hr)
Maximum Altitude:	45,000 ft
Cabin:	Pressurised and Air-conditioned

Purcell Civil & Construction

BUILDING FROM THE GROUND UP

This quarter, we caught up with Pete Purcell and Sharnee Bullock from Purcell Civil and Construction. We asked the young couple from Dalby a few questions about their growing family business in the civil and construction industry.

Tell us a bit about Purcell Civil and Construction. How did your business start, where do you operate and what are your services?

Pete and I are a young family couple based in Dalby. We've got over 10 years of experience in the Construction Industry with Pete working as a Construction Supervisor, and myself on the Contracts/Projects Administration side. I grew up around earthmoving equipment as my parents own a landscaping yard with trucks and loaders etc. located down in the Scenic Rim area of Queensland.

"We were made to drive a loader before we could even drive a car!"

Sharnee Bullock, Part Owner - Purcell Civil & Construction

Having gained a good deal of experience in the Civil Construction Industry, it seemed like a natural progression to establish Purcell Civil and Construction to service the Western Downs Region in Queensland.

We regard our business as a professional provider of civil and construction services for the Rural, Domestic, Industrial, Government, and Resource sectors. Developing from predominantly plant hire operations, we now carry out a vast array of projects, focusing on earthworks of all scales, rehabilitation and environmental works, access tracks, hardstand, and road construction.

What are some of your most recent projects?

Purcell Civil and Construction provides a wide range of services, either self-performing or with the help from key partnerships or hire companies such as Brooks Hire for machinery and equipment that we may not have available or own ourselves.

Some of our recent projects include:

- Onsite earthworks and trenching Projects for Downer Group Engineering.
- Access Tracks and Hardstand construction for Powerlink Queensland Green Hub Project on the Western Downs.
- We spent 4+ months in Central West Queensland providing two final trim graders for 30km construction of roadway for the local Council.
- We've recently been involved with the repairs and maintenance of the guardrails and roadway for the Western Downs Regional Council.
- Shed and tank pads for local residents scaling from small backyard shed pads to large machinery and industrial shed pads.
- Silo foundations and silage pits for local Growers and Grain Corporations in the area.

That's just to name a few.

Has the recent Covid-19 pandemic had an effect on the civil construction industry in your region?

Not that we've experienced. Purcell Civil and Construction has been really fortunate to experience continuous growth over the past 12-18 months despite the Covid-19 Pandemic.

Looking forward, where do you see Purcell Civil & Construction in the next 5 years?

In 5 years from now, we are planning to grow our fleet by investing in more machines and equipment. With more machines on the ground, we'll be able to offer our clients a more extensive service, which will in turn mean employing more staff. Above all of this, our continuous aim is to always deliver top quality service to our clients.

Starting as a small family business ourselves, Brooks Hire can appreciate the hard work that goes into building a company from the ground up. We applaud Pete and Sharnee on their initiative and wish them all the best for a strong future.

BROOKS EQUIPMENT

Quality Italian Products Hit The Showroom Floor

GENMAC

Italdem

Brooks Equipment has taken delivery of their first shipment of construction equipment from Italy. Rock breakers from Italian producer Italdem were delivered in May, followed closely by a shipment of Genmac Generators. These items are now on the showroom floor ready for sale.

When sourcing products for Brooks Equipment, we wanted to make sure we were selling the world's best quality equipment on offer.

Italdem is one of the most well known and respected brands of hydraulic breakers for their durability. Brooks Equipment were so impressed with the quality and reputation of Italdem's products, that we consigned an order for several more sea containers to land in QLD and NSW, along with another order for WA that includes screening and crushing buckets. We have already started selling the first delivery of rock breakers and they are getting fantastic reviews from our clients.

Genmac, also a quality Italian brand, has been producing power generators since 1983. Genmac's philosophy is to produce quality equipment that lasts a lifetime without forgoing safety. Their reliability and durability in all weather conditions made them an obvious choice for Brooks Equipment. Brooks Equipment has imported the Genmac King, Genmac Queen, and Genmac Strong models of industrial sized generators. These 4 cylinder silent generators are designed for continuous use.

In addition to generators, Genmac also produce quality lighting towers. Brooks Equipment has fifty of the Bellatrix transportable lighting towers in stock ready to sell. The benefits of this model is the hydraulic lifting system and integrated sound proof, Japanese made, wet cooled diesel generator. The lights can reach a height of 8.5m and each lamp has its own on/off switch. The single axle trailer means transportation is easy, making them ideal for sporting events, on construction sites, or on motorways performing night-time maintenance.

Brooks Equipment's Husqvarna range has also been expanding rapidly to cater to the requirements of all our clients. We now stock all models of forward and reversible plate compactors, plus double drum rollers, and remote control trench rollers.

Brooks Equipment's Head Office is now located at 39 Murray Road North, Welshpool WA 6106. All of our new equipment is available for viewing and immediate purchase from the head office. We also have stock available for immediate purchase at our other seventeen Australia wide branches including Brisbane, Sydney, Melbourne, and Adelaide. All of our equipment can be shipped directly to your work site at any location in Australia.

When you purchase new equipment from Brooks Equipment, we back up our products with manufacturer's warranties, genuine parts, and qualified service and maintenance.

We also sell a range of used heavy machinery and can even sell your used equipment for you on consignment. You can view our full range of new and used equipment at www.brooksequipment.com.au

Industry Leader Made Better

WesTrac Customer Support Manager, Brad Jones, Brooks Hire Managing Director, Stuart Brooks, and WesTrac Account Manager, Frank Andrich

This year, Brooks Hire took delivery of two Cat® 988K Large Wheel Loaders. They were the first of their kind to join the Brooks Hire fleet. We asked Frank Andrich from Westrac to tell us a bit about this particular model of loader, and the benefits it can offer our clients.

The Cat 988 Wheel Loader has been the industry leader for decades, and the 988K model is no exception. Fuel efficiency has improved by more than 40% over the earlier generation 988 model, and the machine health data provided can be used to optimise production and uptime. These improvements, combined with proven performance and durability, delivered the lowest cost per tonne in the industry. Used primarily for mining purposes, the Cat 988K features a C18 engine which has been built and tested to meet the most demanding applications while still meeting Tier 3 Final/Stage IIIA emission standards.

“The Cat 988K is the best selling large wheel loader in Australia.”

Frank Andrich, Account Manager - WesTrac

It comes as no surprise that the Cat® 988K is a popular model of loader in the mining industry. Not only is the 988K comfortable and easy to operate, it's also an extremely durable machine. The full box-section rear frame is built to resist torsional shock and twisting forces. The solid steel lift arms easily absorb high load stresses, and the linkage pin joints feature a greased pin design with an auto lube system attachment. Operators love the 988K's load sensing hydraulic steering system, and the lift arms work through a Z-bar design providing excellent visibility to the bucket edges and work area.

To add to its already impressive list of features, the 988K uses smart technology to provide flexible levels of information to both the site manager and the operator. Operators can quickly weigh their loads on the go using Cat Production Measurement and touch screen information display, while site managers can connect directly to the machine using the Cat Product Link telematics system. This allows them to track the machine's location, operating hours, productivity, fuel consumption, and payload. This information also helps identify operator training needs, and track maintenance requirements.

Brooks Hire purchased two 988K Large Wheel Loaders at the request of a client. They've been sent to the Pilbara Region in Western Australia on a long term hire contract. Brooks Hire has the buying power to purchase new machines for our clients as they require them. If you need a Cat 988K, or any other large machines on your work site, call Brooks Hire and we will help you get what you need.

Brooks Hire Plant Coordinator Gary Bushell, Asset Manager Vinny Yap, and Frank Andrich

STANDARD EQUIPMENT

- Alarm, back-up
- Alternator, single 150 amp
- Batteries, dry
- Converter, 10/15 amp, 24V to 12V
- Lighting system (halogen, work lights, access and service platform lighting)
- Starting and charging system, 24V
- Starter emergency start receptacle
- Starter lockout in bumper
- Transmission lockout in bumper
- Graphical Information Display, displays real time operating information, performs calibrations and customises operator settings
- Air conditioner
- Cat Detect Vision, rear vision camera system
- Cab, sound suppressed and pressurised, integrated rollover protective structure (ROPS/FOPS) radio ready for entertainment, includes antenna, speakers and converter (12-volt 5-amp) and power port
- Controls, lift and tilt function
- Heater, defroster
- Horn, electric
- Instrumentation, gauges: - Coolant temperature - Engine hour meter - Hydraulic oil temperature - Power train oil temperature
- Light, cab, dome
- Lunchbox, beverage holders
- Mirrors, rearview (externally mounted)
- Rimpull Control System
- Seat, Cat Comfort (cloth), air suspension, six-way adjustable
- Seat belt minder
- Seat belt, retractable, 76 mm (3 in) wide
- STIC Control System
- UV glass
- Transmission gear indicator
- Vital Information Management System (VIMS) with Graphical Information Display: External Data Port, Customizable Operator Profiles, Cycle Timer, Integrated Payload Control System
- Wet-Arm wipers/washers (front and rear): - Intermittent front and rear wipers
- Lights, directional
- Brakes, oil-cooled, multi-disc, service/secondary
- Electro hydraulic parking brake
- Engine, C18 MEUI diesel, turbocharged/aftercooled
- Ground level engine shutoff
- Turbine precleaner, engine air intake
- Radiator, Aluminum Modular Radiator (AMR)
- Torque converter, Impeller Clutch (ICTC) with Lock up clutch (LUC), Rimpull Control System
- Transmission, planetary powershift, 4F/3R electronic control
- Manual switch and automatic fuel priming
- Cat Production Measurement ready

The National Diesel, Dirt & Turf Expo

The National Diesel, Dirt and Turf Expo is Australia's largest construction industry expo, and this year, Brooks Hire and Brooks Equipment were there with our own outdoor display.

Established just five years ago, the DDT Expo has boomed to become a premium annual industry event. The expo brings a massive range of exhibitors including earthmoving machinery dealers, earthmoving attachments, truck dealers, bikes, and turf care machinery. There is also a good variety of entertainment including heavy machinery demonstrations, the Freestyle Kings Motocross performance, and of course Pickles Industrial Auctions.

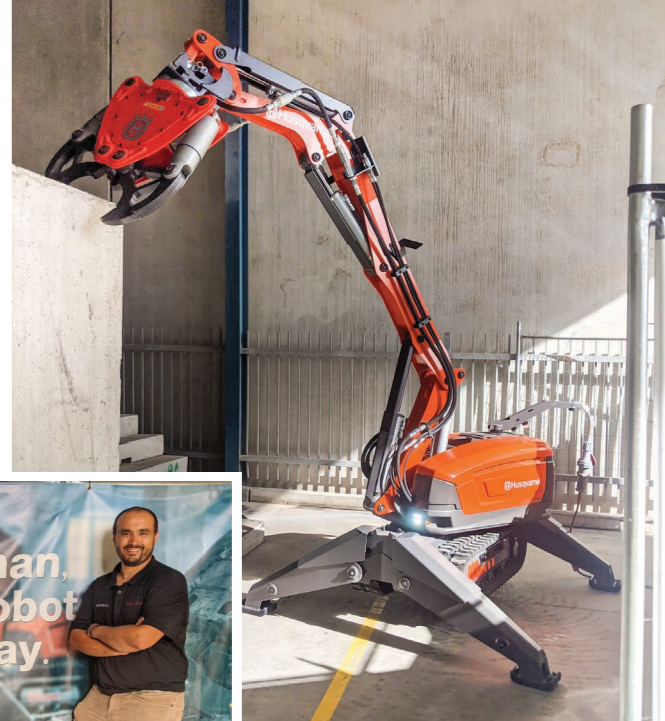

Francisco Lagos - Brooks Hire, Mark Anderson - Husqvarna Construction, and Nathan Fenemer - Brooks Equipment

The National DDT Expo was originally planned to take place in May 2020, where Brooks Hire had purchased a 250sqm outdoor stand. However, in what is becoming a familiar story, due to Covid-19, the May 2020 event was postponed to October 2020, only to be delayed again to April 2021. The delays did nothing to dampen the atmosphere though, with bigger than ever crowds turning out to attend the expo over the course of three days. Sydney turned on its fair share of sunshine making it a great weekend all round.

The highlight of the Brooks Equipment stand was the Husqvarna DXR Demolition Robot. The remote controlled demolition robot can be fitted with a variety of attachments including hammers, crushers, and steel shearers. These machines have been purpose built to tackle the jobs that are too strenuous for humans. The 'smart' arm can rotate 360 degrees like a battle tank turret allowing excellent reach. We knew this machine would be a hit at the expo.

Our Brooks Equipment General Manager, Nathan Fenemer flew to Sydney a few days before the event in order to do some training with the demolition robot. He was joined by our Sydney Sales Representative, Francisco Lagos who turned out to be quite a pro operating the machine. In fact, Francisco was such a hit with the robot that he drew large crowds to our stand on all three days of the expo.

“What a fantastic event! Francisco was a rockstar on the demolition robot. Everyone loved it.”
Nathan Fenemer - Brooks Equipment

In addition to displaying an extensive range of Husqvarna equipment, Brooks Hire was also able to showcase some of our larger machinery. Our Sydney Branch Manager, Mark Barbaro was key in organising the heavy equipment, and arranging transport. A brand new Komatsu WA470-8 sat proudly on display at one end of our stand, while a Caterpillar CP76B Padfoot Roller attracted attention from the other side. With a sea of yellow and black flags and banners, it was hard to miss the Brooks Hire / Brooks Equipment site. Overall this year's National Diesel, Dirt and Turf Expo was a massive success, and we look forward to being back again next year - bigger and better than ever.

Lenore Brooks, Joe Kapiteyn, Duke Kapiteyn, and Stuart Brooks.

A Generational Visit...

For many years, the Brooks Hire plant room was coordinated by a well known character, Dirk Kapiteyn. Dirk was with Brooks Hire from the mid 90's for well over a decade until he unfortunately passed away. A photo of Dirk still hangs proudly in his office at the Brooks Hire Head Office in Canning Vale.

In April we were contacted by Dirk's son, Joe Kapiteyn who requested to bring his own son, Duke to visit his grandfather's workplace. Duke was named in honour of Dirk's favourite actor, John 'The Duke' Wayne. Father and son visited our yard on what would have been Dirk's 75th birthday, Friday 23rd April 2021. Little Duke was delighted with his personal tour of the dump trucks, loaders, and excavators, and we were delighted to have them both visit.

Dirk Kapiteyn with his son Joe as a toddler.

Doug Brooks (left) and senior staff members Joy Fritchick, Peter Ryan and Dirk Kapiteyn admire the prize Harley-Davidson.

Sydney Cracks 40!

The Brooks Hire team in Sydney celebrated a milestone this May - 40 machines out on hire! This marks a 100% rise in productivity since the same time last year.

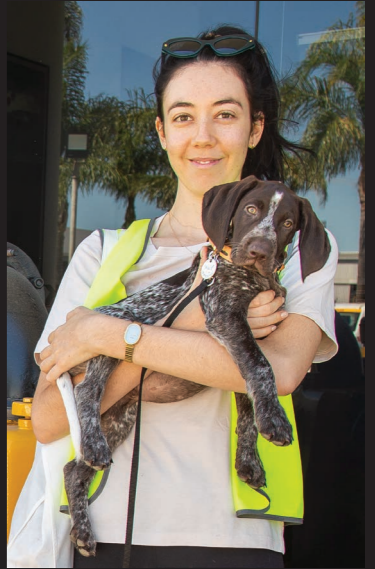

Here's the crew, Michael Alarcon, Mark Barbaro, Francisco Lagos, and Tim Hearn celebrating in style with smoked BBQ Beef cooked by Francisco. Our TA, Jacob Keeble was unable to make the barbecue but is definitely a valued member of the team. Keep up the hard work guys, can't wait to see what's on the menu when you crack 50 machines on hire.

Welcome Wall-E!

Meet Brooks Hire's cutest new team member - Wall-E.

For those with a long memory, Doug Brooks started Brooks Hire with his trusty dog Jack forever by his side.

Now, carrying on the tradition, Lenore Brooks has brought young Wall-E into the fold. Wall-E is a German Shorthaired Pointer pup who has been immediately promoted to the role of Hire Manager's Assistant. So far he's proven himself to be a very friendly team member with a penchant for stealing work boots. Welcome aboard Wall-E.

CCF QLD Field Day & Brisbane Truck Show

It was all happening in Brisbane from 13th - 15th May with the Civil Contractors Federation of QLD holding their Field Day in conjunction with the Brisbane Truck Show. The partnership meant punters received reciprocal ticketing to both events and a free shuttle running between them.

Brooks Hire and Brooks Equipment were registered exhibitors at the CCF Field Day with a 100m outdoor stand to display our machinery and equipment. Dwayne Unahi from Brooks Hire took responsibility for the larger machinery, while Nathan Fenemer from Brooks Equipment teamed up with Mark Anderson from Husqvarna to show off our range of smaller construction equipment.

Brooks General Manager, Josh Willett and Transport Manager, Patrick Scott attended the Brisbane Truck Show on behalf of Brooks. Having three Drake low loaders on order, Pat made sure to talk business at the Drake stand. Both events attracted supreme exhibitors and large crowds over the three days.

Patrick Scott
Brooks Transport Manager
(Eastern Region)

New Machines

The Brooks Hire Fleet

WOW!!! This is a new record. Brooks Hire has taken delivery of 108 x Large Machines, 61 x Small Equipment (generators, compressors etc.), 10 x Light & Heavy Vehicles, and 22 x Machine Attachments in the last 3 months alone. That's a total of 201 pieces of equipment in one quarter!

Caterpillar 988K ▶ Wheel Loader x 2 L251 & L252

These two Cat 988K Large Wheel Loaders are the first of their kind to be added to the Brooks Hire fleet. With a massive 6.4m³ bucket, this machine can shift some serious dirt. They feature a Tier 3 engine which makes them fuel efficient with lower emissions. We purchased these two loaders at the request of a long term client. They were delivered to our Perth yard before being sent to the Pilbara Region on a long term hire contract.

◀ Komatsu Excavators PC138US-8, PC88MR, PC55MR

We've taken delivery of so many brand new Komatsu excavators in this size range that we simply can't show them all. Here's 3 that all arrived on the same day.

◀ Water Trucks

Last year, Brooks Hire secured all Isuzu and Hino trucks being delivered to Perth for at least 6 months. These trucks are being fitted with water tanks and are arriving at our yard daily.

◀ Komatsu HM400 Dump Trucks

A total of 8 x Komatsu HM400 Articulated Dump trucks have been received this quarter.

◀ Caterpillar 226D3 Skid Steers

We've purchased a range of wheeled and tracked Caterpillar Skid Steers to add to our hire fleet.

◀ Crown Diesel 9 Tonne Forklift FL021

Another first for the Brooks Hire fleet. We welcomed this 9 tonne Crown Diesel Forklift to our Perth yard in March. These forklifts offer superior operator comfort and come with an Operator Sensing System to provide superior operator and forklift safety.

◀ Genie S-85 XC Telescopic Boom

This is the first Telescopic Boom Lift, also known as a Straight Boom Lift in our hire fleet. It reaches a very tall 85 feet and features an extra capacity basket.

Genie Z45 XC ▶ 45ft Articulated Boom Lift

With the addition of our new 'Access' division, we've been acquiring a range of brand new elevated work platforms including this Genie Z45 XC knuckle boom. This particular model features an up-spec mesh extra capacity basket which can hold a massive 450kgs. That's over 200kg more than most others in its class.

◀ Komatsu WA500 Wheel Loaders

Brooks Hire purchased two of these Komatsu WA500-8YL model loaders with a 5.5m³ bucket with KVX Teeth. This model of loader is extremely popular with our clients because of their reliability and durability. We have another five WA500s on order waiting for delivery.

◀ Merlo Panoramic P60.10 Tele Handler

We've actually added four tele handlers to the Brooks Hire fleet this quarter. This is our only Merlo, and with a lifting weight of 6 tonnes, is also the heaviest tele handler in the fleet. The Merlo P60.10 has a maximum reach of 5.3 metres.

JLG R1932 19ft SCISSOR LIFT ▶

This 19 foot Scissor Lift was the very first piece of equipment to be delivered for our 'Access' division. It was only in the yard for one day to be stickered up before being snapped up for its first hire job. Since then, Brooks Access has purchased a range of JLG and Genie Scissor lifts up to 43 feet.

Italtower Astrid Lighting Towers ▶

These Italian made lighting towers were purchased specifically for our hire fleet. They can reach an impressive 8.5m tall and feature 4 x 350W LED Lights. It's one of the most powerful lighting towers in its category. We had seven of these lighting towers delivered in one day.

◀ Caterpillar 428 Backhoe Loader

The Cat 428 is a popular model of backhoe that is well known for its reliability and productivity on small construction sites.

Left to right: Major Motors Sales Manager Frank Johnston, Brooks Hire CEO Doug Brooks, Major Motors Managing Director Bob Pearce, Brooks Hire Asset Manager Vinny Yap, and Major Motors Sales Consultant Richard Morosini

A Major Deal

Major Motors turns apprentice into master

If there is one company that raises a somewhat sentimental touch with Major Motors, it's Brooks Hire.

This has been a long relationship.

It began in 1972, when a somewhat laid-back Doug Brooks, a dedicated surfer at the time, virtually living the life of a hippie, applied for a job as an apprentice diesel mechanic at Major Motors.

From Doug's recollection, he short listed Major Motors as a place he'd like to work, so he built up the courage to approach Tony Morey, the Service Manager at the time. Tony told the young lad, "Doug, if you haven't got a job in two weeks, come back and see me." Knowing a break when he saw one, Doug came out of there 'happy as hell'. He went surfing for two weeks. Then he came back and said, "Tony, I haven't got a job yet", and Tony gave him a job.

Bob Pearce, Managing Director of Major Motors, remembers Doug joining the company when Major Motors operated on the Great Eastern Highway. At this time, Major Motors were dealers for Detroit Diesel as well as Isuzu, so Doug was able to gain experience overhauling Detroit Diesel engines as well as working on Isuzu Trucks.

"He applied to Major Motors to transfer from his previous employer who had lost some major contracts meaning that Doug was made redundant," said Bob.

"Our Service Manager at the time, Tony Morey was impressed by Doug and offered him the opportunity to continue his Diesel Mechanic Apprenticeship with us."

It would be fair to say that Doug had an indomitable spirit- laid back and very much doing his own thing.

"I remember everyone commenting about the fact that this guy was always the first into work until we realised he was living in his Ford panel van in the car park," Bob said.

"Brooksie was a character, but despite his surfer lifestyle, he had the makings of a very good diesel mechanic"

Bob Pearce, Managing Director - Major Motors

"He was with Major Motors from 1972 till 1976, worked well in the team, finished his apprenticeship, and to be honest it comes as no surprise that from those early beginnings he has become a great Australian success story," added Bob. "His journey was by no means the typical one, but a success story built from nothing and from our point of view, hats off to him, and our most sincere congratulations for having recently celebrated 40 years in business."

"When you consider the number of businesses that battle to get past five years and how Brooks Hire began with just two compressors operating from a tin shed at Eneabba - it's a remarkable story."

"The tale of him driving a crane 13 hours to get it to Eneabba because he didn't have the funds to have it transported, is a classic demonstration of just how determined he was to make the business a success."

In addition to the early days of Doug being a member of the Major Motors team, Bob added that it has been most gratifying that the relationship has long continued. Over the years Major Motors has supplied more than 100 trucks to Brooks Hire, as well as several Isuzu D-MAX utes.

"It began with Brooks Hire taking delivery of an FVZ 1400 in July 2009. Since then, we have supplied Brooks Hire with a further 117 vehicles," said Bob.

Quite a few of them have taken the role of being water carriers for project sites, while others have worked as service and fuel trucks, articulated platform carriers, and to whatever use that Brooks Hire can see a demand for. "The fact that Brooks Hire chooses them for a wide variety of tasks demonstrates not just their versatility, but the fact that they're a good solid truck for some of the toughest conditions," said Bob. "Isuzu produces a great range for just about every purpose, they're extremely well backed up with parts and accessories and their resale value holds well to make them a very sound business proposition. We are very proud to be one of the principal dealerships of Isuzu in Australia."

With a lineage that goes back to 1934, Major Motors has grown to become one of the country's biggest dealers of this highly popular and reliable workhorse. Since moving from the Great Eastern Highway site where Doug worked, the company has its main centre of operation in Forrestfield.

The branch where the renowned Isuzu D-Max ute and the MU-X are presented is at Bibra Lake while a specialised parts and service centre is in Malaga to service the northern suburbs. Further to that, there's a parts and service base in Port Hedland in newly established premises.

Bob Pearce has been with the company since 1971 - which is now half a century. Quite a few of the staff have notched up 25 years, which is something that has made a significant contribution to the company's growth. Bob added, "There is nothing better than having a stable team within an organisation. It means our team knows what they are doing and they are familiar faces to our clients. You can't underestimate the importance of this. The more knowledge a team has of its clients' needs the more likely your clients will stay with you. It's what enables a business to grow and succeed... something that has also been the key to the success of Brooks Hire."

CHARITY FEATURE

2021 Variety Ball

Raising the roof to raise funds for a good cause

The Variety Ball! The highlight of the Brooks Hire social calendar, an extraordinary evening of good food, fantastic entertainment, and most importantly, an opportunity to raise funds for a very worthwhile cause.

After a false start in February due to a Covid-19 lockdown, Variety - The Children's Charity WA held their annual ball on Saturday 27th March 2021. For the very first time, the ball was held at Crown Towers with food, beverages, and entertainment fit for a king.

This year, the sold out event featured an otherworldly 'Under The Sea' theme. As guests arrived, they were greeted by a real life mermaid in the sparkling blue Crown Towers pool. They were then treated to canapes and cocktails before being seated for the main event. The food was a culinary masterpiece, but it was the entertainment that was a feast for the senses. Jam packed with entertainment, guests were left enthralled by an array of gymnasts, dancers, singers, musicians, and a heartwarming performance by some of the Variety kids.

Brooks Hire support the Variety Ball every year, and this year was no exception. Doug & Roma Brooks had their invitation personally delivered to Brooks Hire's head office by Aquaman and Aquagirl months in advance. The Brooks family purchased a VIP 'Poseidon' table for 10, several charity bears, and were also the winning bidders of a stunning pearl necklace that was kindly donated by Linneys, with all profits going to the children's charity.

In total, the 2021 Variety Charity Ball in WA raised over \$220,000 for kids in need. Special mention should be made to event Chair, Judy Paioff, and the valued sponsors including Thrifty Australia, Channel 9, Linneys, Forester Estate, Crown Perth, Carmelo Entertainment, Feral Brewing Company, and Di Taylor.

Variety - The Children's Charity supports kids and families who are facing many challenges through sickness, disadvantage, or living with a disability. The money they raise through the Variety Ball and other fundraising events throughout the year contributes to equipment grants, support programs, scholarships, and enriching experiences that bring joy to kids and their families.

Claire's March Charge

Congratulations to our Brooks Access General Manager, Claire Harrison who took part in the March Charge Fitness Challenge to raise funds for Cancer Research this year.

Organised by the Cancer Council, March Charge encourages entrants to set a personal fitness goal for the month of March and then share their goals and raise sponsorship.

In March 2021, Claire ran 50 kilometres and cycled 60 kilometres, raising an impressive \$3,315. This made her the 38th highest fundraiser out of 11,114 entrants.

Not only does the money that Claire raised go towards research for life saving cancer treatment, she has also raised awareness of the cause through her participation.

Well done Claire, we're proud to have you on the Brooks team.

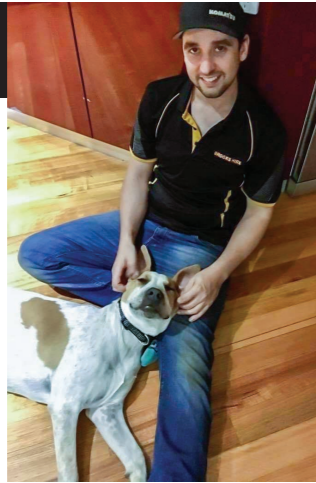

2021 Shitbox Rally

After much anticipation the Shitbox Rally is on again. We were stoked to get a visit from our sponsored rally car - Duct Tape & Cable Ties, being driven by Adam Costello and Steve Hammond. The boys were preparing to leave for the Autumn Rally from Alice Springs to the Gold Coast. The Shitbox Rally is an annual charity event to raise money for cancer research. It's a fun, colourful, unpredictable adventure. Participants must use a vehicle that is worth less than \$1000 to participate in the rally. To find out more, or to make a donation, visit www.shitboxrally.com.au

Spotlight On

Josh Willett

Josh joined the Brooks team in 2014 as Workshop Foreman at our Perth Head Office. Since then, Josh has worked his way up the ranks and is now known as CCO (Chief Cake Officer) of Queensland.

What was your first job: Paper boy.

What is your role at Brooks Hire: General Manager - Eastern Region.

What achievement in life are you most proud of: My job.

How would you describe yourself in 3 words: Cheese on toast.

Where would we find you on the weekends: Renovating my house of sticks.

What is something that you're really good at: I can't give away all my secrets!

What is something that you're really bad at: Losing - don't ask me to play Monopoly.

If you could invite anybody to dinner (dead or alive), who would it be: Elon Musk - sorry Nathan, me and Elon go way back.

You're going to a Super Hero party, who do you dress up as: Venom. Does anyone have a morph suit?

Favourite type of cake: I don't like cake...

What song best sums up your life: You Were Right by Rufus Du Sol.

Welcome Aboard

James Hart

What was your first job: Dish boy at a pub.

What is your role at Brooks Hire: Foreman - Melbourne VIC.

What achievement in life are you most proud of: Marrying my wife and having our beautiful daughter.

How would you describe yourself in 3 words: Easy going, patient, friendly.

Where would we find you on the weekends: Repairing rust on my project car or spending time with my family.

What is something that you're really good at: Making cocktails.

What is something that you're really bad at: Dealing with cockroaches.

If you could invite anybody to dinner (dead or alive), who would it be: Mac Miller.

You're going to a Super Hero party, who do you dress up as: Deadpool.

Favourite type of cake: New York Baked Cheesecake.

You're going to a Super Hero party, who do you dress up as: Rick Sanchez.

Favourite type of cake: Nan's rum balls.

What song best sums up your life: This Must Be The Place by Talking Heads.

Vinny's Kitchen

Spring Onion & Ginger Pork Belly

Ingredients A
600g Pork Belly, sliced into 2-3mm thickness, 2 inches long
1/2 Bunch Spring Onions, sliced (separate white & green stalks)
1 Small Brown Onion
6-7 Slices of Ginger
6-7 Dry Red Chilli (optional)

Ingredients B (marinade)
2 Tbsp Soy Sauce
1 Tbsp Chinese Rice Wine

Ingredients C (sauce)
1 Tbsp Chinese Rice Wine
1 Tbsp Oyster Sauce
2 Tbsp Soy Sauce
1 Tbsp Salt
1/2 Tbsp Sugar
1 Tbsp Corn Starch mixed with 125ml water

1 Tbsp Sugar
A bit of Corn Starch

Method

1. Mix Ingredients B to make a marinade. Marinate the pork belly slices for 30 minutes.

2. Bring a large non-stick frying pan up to high heat, then reduce to medium-high heat. Transfer pork belly and cook until nicely browned.

NOTE - do not add oil to the pan, oil will be released from the pork belly. Transfer the crispy pork belly onto a holding plate and keep a fair amount of oil in the pan.

3. Add ginger, onion, white spring onion stalks, and chilli to the hot oil and stir fry until fragrant. Return the pork belly to the pan and continue to stir fry. Pour sauce Ingredients C simultaneously into the pan and stir fry until the sauce thickens up. Add the green spring onions and stir fry for a few more minutes. **NOTE** - add more water if you like it a bit more saucy. Serve and enjoy!

Brain Teasers

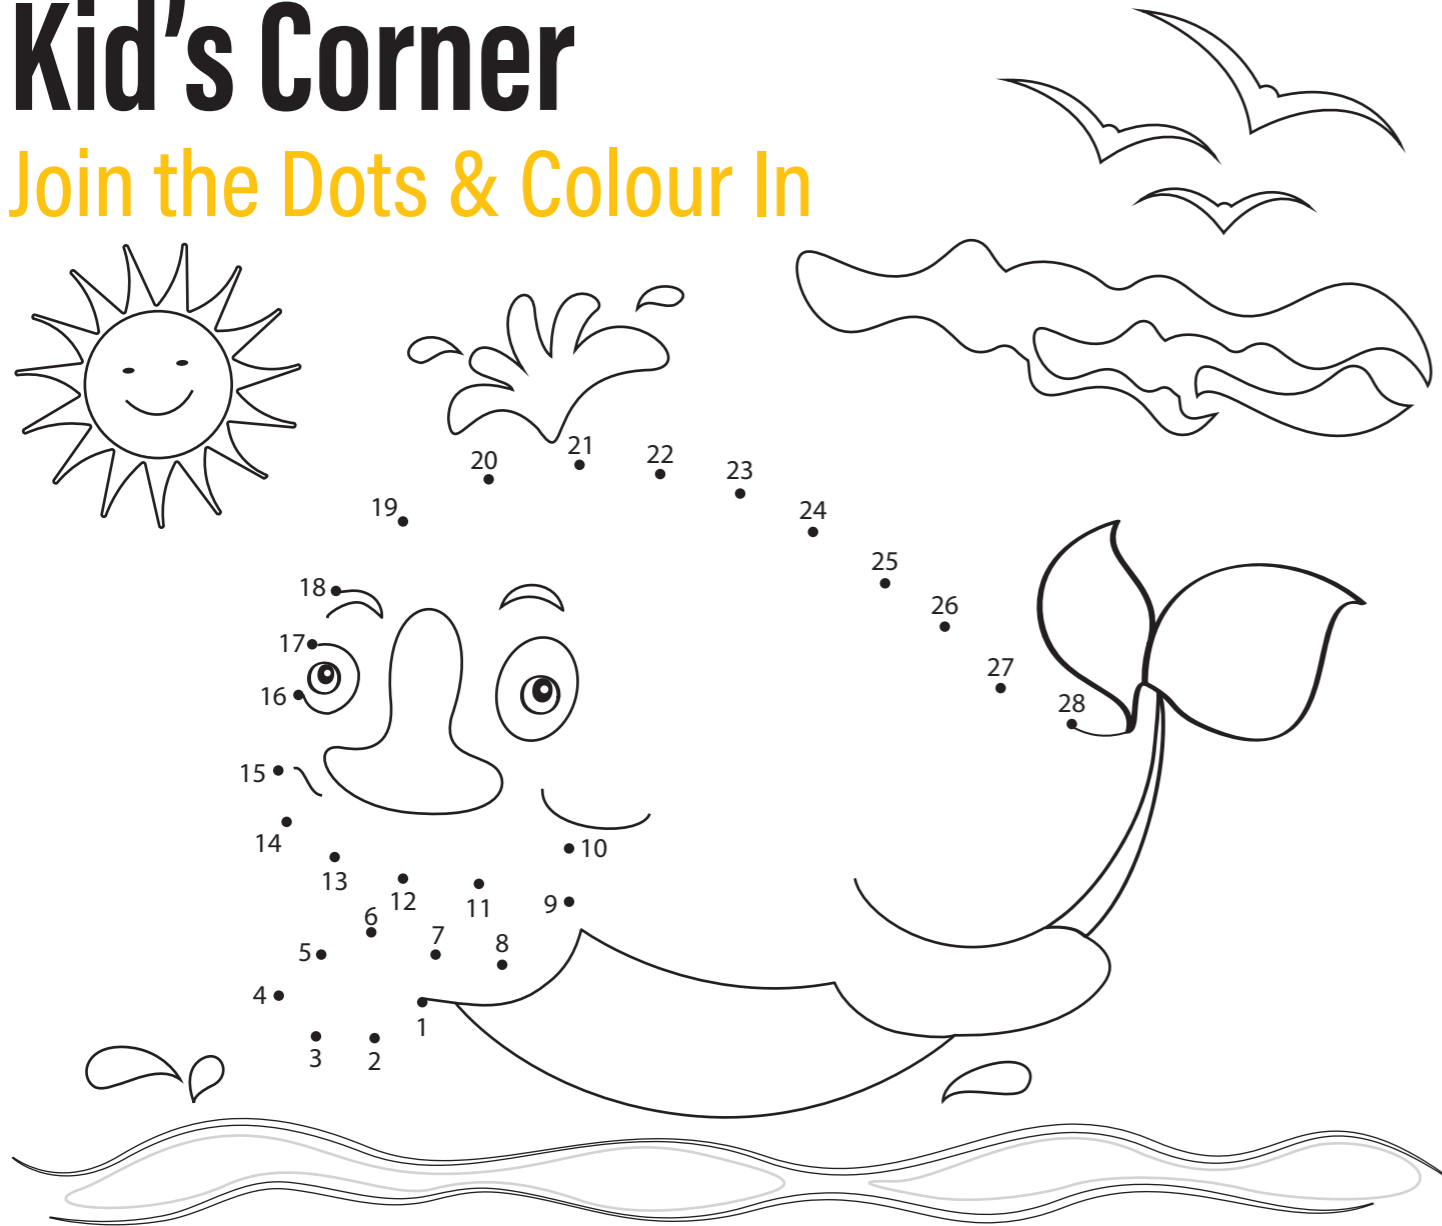

1. A man wanted to encrypt his password but he needed to do it in a way so that he could remember it. He had to use seven characters consisting of letters and numbers only (no symbols like ! or <). In order to remember it, he wrote down "You force heaven to be empty."

What is his password? _____

2. **WHAT AM I?** _____
- I'm a fruit.
 - If you take away my first letter, I'm a crime.
 - If you take away my first two letters, I'm an animal.
 - If you take away my first and last letters, I'm a form of music.
